The Library organizes training courses how the use databases and other electronic resources available. If you are interested, you find information on the Library's web page. We offer also personal counseling, please contact the Librarian directly.
The Library was founded in 1969. It collects books and periodicals related to computer science, control theory, automated measurements and instrumentation, robotics and management engineering. It owns over 12,000 volumes and 450 periodicals.

In collaboration with SBS (Sistema Bibliotecario della Sapienza), the Library gives access to the main databases in the field of IT and management, in particular: ACM Digital Library, IEEE Digital Library, Business Source Premier, Inspec, Web of Science, Derwent Innovation, SIAM e-journals.

The Library is open to everyone. It offers 87 reading places and 4 computer workstations.

To access the library, you need a valid personal document (i.e., identity card, driving license, or passport). Students may request (directly or via the Internet) the interlibrary loan for a maximum of 15 days.

After subscription, you can borrow up to 3 volumes at a time (excluded general consultation book, exam paper, and periodicals). For Sapienza students, service can be accessed via Infostud credential.

Both catalogs are accessible via the Internet:
- http://www.biblioteca.unibo.it/acnp
- http://www.periodicozionale.unibo.it/acnp

You can remotely reach the e-books owned by the library and the catalog of books and periodicals.

In collaboration with SBS (Sistema Bibliotecario della Sapienza), the library hosts over 1,200 volumes and 450 management engineering, control theory, computer science, control theory, collected books and periodicals referred to.

The Library is open to everyone. It offers 87 reading places and 4 computer workstations.
